Marietta, Ohio 45750

October 31, 1976

Dear Mr. Bann:

A recent review of your Operational Report, describing the on-site disposal of certain filter cake waste from chemical processes at your plant, has revealed that those wastes described are of a semi-solid nature.

Semi-solid wastes cannot be landfilled without obtaining plan approval and a Permit to Install from this agency.

Referencing Section 3745-27-09 - (1) of the Ohio Administrative Code:

" No operator of a solid waste disposal facility shall accept sewage solids, semi-solids, or liquids; other semi-solid or liquid wastes; or hazardous wastes, unless detail plans for such disposal have been approved by the Director and a Permit to Install obtained as required by Chapter 3745-31 of the regulations of the Ohio EPA. Plans shall be approved only if the applicant demonstrates to the Director's satisfaction that disposal of the above types of waste materials in the manner proposed will not cause water pollution or create a nuisance or a health hazard".

Disposal of plant wastes on-site should cease immediately and engineering plans submitted if continued use of the disposal site is desired.

An alternative to landfilling this material would be removal to an approved disposal site or treatment facility.

Should you have any questions, please contact me at this enclosed address or telephone 614-385-8501.

Sincerely yours,

Jerry R. Roberts
